

# FUSED LEADS

## FUSED LEADS

Rated Voltage	Lead Cross Section:		Lead Length:	Fuse Trip Current:	Max Interrupt Current:
1000V CAT IV	2.5mm <sup>2</sup>	CE	150 cm	1A	10kA

### FEATURES:

The Fused Leads from Power Monitors incorporate UL-listed Littelfuse® fuses. PMI offers a fused voltage lead kit for supplemental overcurrent protection with the Revolution and Eagle Power Quality recorders. Although not required to meet UL safety standards with these recorders, the fused lead kit can provide an extra layer of protection from arc flash and other hazards possible with a short circuit in a CAT III/IV location.

### FUSED LEADS:

PMI's models of test leads are highly flexible with silicone insulation, in-line 4 mm diameter MULTILAM plug and rigid insulating sleeves on both ends.

For more information on PMI Fuse Leads, give us a call at 1-(800) 296-4120.
